

The Investment Strategy

**Investment
Strategy**
Northern Ireland

SIB is currently working to develop the Executive's next Investment Strategy, which provides a long term strategy setting out the investment priorities for Northern Ireland. The Investment Strategy is one of the core strategic documents to support the delivery of the Programme for Government outcomes. We would welcome your thoughts, feedback and ideas in developing the strategy, its structure and priorities going forward.

Please indicate the area of infrastructure investment you are interested in providing information or comments about. If you would like to provide information about more than one area, you are welcome to complete a second form.

The Investment Strategy is a document prepared by the SIB and reflects the PfG priorities and also the fiscal situation.

Role in SIB (for external – organisation):

1. The investment strategy has been structured around “pillars”. Please indicate which area of infrastructure you are providing information about.
 - Transport and mobility (including ports, airport, road, rail, bus and cycle/walk)
 - Skills and Learning including schools, further and higher education and lifelong learning
 - Health and Social Care including primary, secondary and tertiary care, and social care
 - Justice including courts, prisons, police and probation
 - Social and Community including sport/leisure and culture and housing
 - Industry and innovation
 - Digital and communication
 - Water and waste
 - Energy
2. Thinking about this area of infrastructure expenditure – what do you think are the main gap/needs for investment in Northern Ireland and why?

Large empty light blue rectangular area for providing answers to the questions above.

3. Thinking about this area of infrastructure, what do you think should be the 'flagship' projects or programme areas that should be identified as a priority for investment in the coming years? (Please identify no more than three)

4. Why do you think these projects/programmes should be a priority? (Please provide evidence or further information if you are able to e.g. links to research/reports or surveys).

5. Are you aware of examples of good practice where such flagship projects or programmes of investment have been made, if so please provide details e.g. where, when?
